Module 1

Overview of Microsoft Project 2010

Success Factors to Project Management

- What is a Project?
- Project Management Software
- Why use Microsoft Project 2010?
- Formulate a Strategy
- Success Checklist

Exploring the Ribbon

- What is the Ribbon?
- Task Tab
- Resource Tab
- Project Tab
- View Tab
- Format Tab
- File Tab (Backstage) Task Tab

Exploring the Project 2010 Views

- What is a View?
- Task Views
- Resource Views
- Combining Views

Module 2

Initializing a Project

Creating and Configuring Calendars

- How Calendars Work in Project 2010?
- Creating a Base Calendar
- Setting Working Hours and Days
- Setting Non-Working Hours and Days
- Setting Calendar Options
- Saving the Base Calendar to the Global Template
- Practice: Creating Calendars

Configuring Schedule/Display Options

- Understanding Duration vs. Work/Effort
- What is Effort Driven Scheduling?
- Understanding Task Types
- Setting Schedule Options
- Setting Display and General Options
- Practice: Configuring Schedule/Display Options

Creating and Saving a Project Schedule

- Creating a New Project Schedule
- Adding Project Information
- Creating a Schedule from an Excel Workbook
- Crating a Schedule from a SharePoint Task List
- Importance of Naming Standards

- Saving the Schedule
- Setting Read-Only and Password Attributes
- Save and Send Options
- Practice: Creating and Saving a Project Schedule

Module 3 **Creating a Work Breakdown Structure**

- Overview of WBS
 - What is WBS?
 - Task Categories
 - Best Practices
- Creating the Work Breakdown Structure
 - Entering Tasks
 - Working with Task Information
 - Outlining Tasks into a Hierarchy
 - Displaying Outline Numbers & WBS
 - Customizing WBS Codes
 - Practice: Creating a Work Breakdown Structure
- Estimating Task Lengths
 - Overview of Estimating
 - Entering Estimates
 - Practice: Entering Estimates
- Entering Milestones
 - How to Set a Milestone
 - Apply Milestone Filters
 - Best Practices
 - Practice: Entering Milestones

Module 4 **Creating Task Relationships**

- Automatic vs. Manual Scheduling
 - Scheduling Overview
 - Manual vs. Automatic Scheduling
 - When to Use Manual Scheduling
 - Setting Scheduling Option
 - Adjusting Tasks in Manual Mode
 - Practice: Working with Manual and Automatic Scheduling
- Working with Dependencies
 - Task Dependency Types
 - Creating Dependencies
 - Viewing Dependencies
 - Best Practices for Using Dependencies
 - Practice: Working with Dependencies
- Understanding Leads and Lags
 - What is Lead Time?
 - What is Lag Time?
 - Best Practices
 - Practice: Working with Leads and Lags

Module 5 **Configuring Advanced Task Information**

Working with Task Constraints

- What are Constraints?
- Constraint Types
- Actions that Create Automatic Constraints
- Effects of Constraints
- Practice: Working with Task Constraints

Advanced Task Management

- Task Deadlines
- Using the Task Inspector
- Using Task Form Views
- Adding Notes to Tasks
- Applying a Calendar to a Task
- Splitting Tasks
- Changing the Start Date of a Project
- Working with Timescale
- Practice: Working with Advanced Task Management

Module 6 **Creating Resources**

Resource Types

- Work Resources
- Cost Resources
- Material Resources
- Budget Resources

Creating Work and Material Resources

- Creating a Work Resource
- Resource Information – General
- Resource Information – Costs
- Resource Information – Notes and Custom Fields
- Inserting Resources
- Creating a Material Resource
- Practice: Creating Work and Material Resources

Creating Cost and Budget Resources

- Overview of Costing in Microsoft Project
- Creating a Cost Resource
- Creating a Budget Resource
- Entering a Fixed Cost
- Practice: Creating Cost and Budget Resources

Assigning Material, Cost and Budget Resources

- Assign a Cost Resource
- Assign a Material Resource
- Assign a Budget Resource
- Practice: Working with Resources

Module 7 **Assigning and Leveling Work Resources**

Overview of Assignments

- What is an Assignment?
- Assignment Formula

- How to Create Assignments
 - Creating Fixed Unit Assignments
 - Creating Fixed Work Tasks
 - Practice: Creating Assignments
- Factors that Affect Assignments
 - Percentage Assignments
 - Assignment Units and Peak Units Values
 - Resource Calendar
 - Delaying an Assignment
 - Assigning Resources with Variable Units
 - Rules for Creating Assignments
 - Best Practices
 - Practice: Working with Factors that Affect Assignments
- Viewing Resource Assignments
 - Resource Usage View
 - Task Usage View
 - Team Planner View
 - Practice: Viewing Resource Assignments
- Resolving Resource Overallocations
 - Understanding Overallocations
 - Views to Identify Overallocations
 - Leveling Resources – Project Manager
 - Leveling Resources – Microsoft Project
 - Practice: Resolving Resource Overallocations

Module 8 Reviewing and Finalizing the Schedule

- Working with Groups and Filters
 - What are Groups?
 - How to Use Groups
 - What are Filters?
 - How to Use Filters
 - How to Use Highlights
 - How to Use AutoFilter
 - Practice: Working with Groups and Filters
- Understanding the Critical Path Method
 - What is a Critical Path?
 - Formatting Views to Display Critical Path
 - Setting Slack Tolerance
 - Shortening the Critical Path
 - Practice: Working with the Critical Path
- Setting a Project Baseline
 - What is a Baseline?
 - Fields Used in Setting a Baseline
 - Setting the Baseline
 - Updating a Baseline
 - Views Using Baseline Data
 - Practice: Setting a Project Baseline
- Appendix

Appendix – Default Groups

Appendix – Default Filters

Module 9 Tracking and Updating Projects

Overview of Tracking Projects

What is Tracking

Tracking Methods

Options that Affect Tracking

Best Practice of Tracking

Tracking Projects

Preparing a Task to be Tracked

Using Percent Complete

Using Task Level Tracking – Task Duration

Using Task Level Tracking – Task Work

Using Resource Level Tracking – Task Details

Using Resource Level Tracking – Resource Usage

Practice: Working with Tracking Methods

Updating Milestones, Material and Cost Resources

Updating Milestones

Updating Material Resources

Updating Cost Resources

Practice: Updating Milestones, Material and Cost Resources

Updating Project Status

Overview of Tracking Cycle

Setting a Status Date

Rescheduling Incomplete Work

Getting the Project Back on Track

Practice; Updating Project Status

Module 10 Managing Multiple Projects and Resource Pools

Linking Multiple Projects

Overview of Multiple Projects

Cross-Linking Projects

Analyzing the Effects of Changing Values

Practice: Linking Multiple Projects

Working with Master and Sub-Projects

Overview of Master Projects

Creating a Master Project and Inserting Sub-Projects

Leveling Resources Across Projects

Practice: Working with Master and Sub-Projects

Working with Resource Pools

What is a Resource Pool?

Creating a Resource Pool

How to Share Resources across Multiple Projects

Viewing Resource Usage in the Resource Pool

Practice: Working with Resource Pools

Appendix A **Customizing Project 2010 Features**

Customizing the User Interface

- Customize Quick Access Toolbar
- Customizing the Ribbon
- Exporting / Importing the Customization File

Customizing Formats and Styles

- Overview on Custom Formats and Styles
- Customizing Gantt Views
- Customizing Timeline Views

Working with the Organizer

- What is an Object & Available Objects
- Define Setting in Organizer
- Using the Organizer to Share Objects

Creating Custom Objects

- Creating a Custom Field
- Creating a Custom Filter
- Creating a Custom Group
- Creating a Custom Table
- Creating a Custom View

Appendix B **Communicating Project Information**

Defining Print Settings

- Print Settings
- Define Page Setup
- Working with Copy Picture to Office Wizard

Working with Project Reports

- Selecting Project Reports
- Editing Project Report
- Creating Custom Project Reports

Working with Visual Reports

- Overview of Visual Reports
- Anatomy of a Pivot Table
- Viewing Visual Report
- Creating Visual Report Templates

Collaborating Project Information

- Export Project Table to Excel
- Publish a Project to SharePoint List
- Import a SharePoint List into Project
